

Page 1. Common First Prompt

Step 1. Start a New Chat (새로운 채팅 시작)

사용할 생성형 AI 도구(ChatGPT, Claude, Gemini 등)의 새로운 일반 채팅창(New Chat)을 연 후, 아래 박스 안의 영문 문장을 첫 번째 프롬프트로 그대로 복사하여 입력하세요.

COMMON FIRST PROMPT (복사용)

For the rest of this chat, do not use an interactive preview as the main output. Whenever you create or revise an activity/app, always provide the complete, up-to-date code as a single, self-contained HTML file in one code block. Do not provide only the changed parts of the code.

진행 안내 (Instructions)

- AI의 첫 응답(알겠다는 확인 메시지 등)을 확인한 뒤, 다음 페이지(Page 2)에 배정된 과업을 열어주세요.
- 그 이후부터는 본인이 적절하다고 생각하는 방식으로 AI와 자유롭게 상호작용하며 과업을 수행하세요.
- 과업 수행 중에는 다른 참가자의 도움이나 외부 자료, 사전에 준비한 프롬프트를 사용하지 않습니다.

Page 2. Individual Design Task — Task 03

1. Learner Context

- Target Learners: Approximately 30 Korean Grade 8 EFL students
- Proficiency Level: Varied, but mostly approximately at the A2–B1 level
- Usage Situation: Individual activity for approximately 10 minutes during an English lesson

2. Learning Material: Starting a Recycling Project

A group of students wanted to find out how much waste their school produced each day. They decided to set up recycling boxes for paper and plastic. They also asked classmates to sort out their waste carefully. At first, many students did not pay attention to the recycling signs, so the team came up with a simple points game. With more students joining the project, the team was able to carry out the plan for an entire month.

3. Target Expressions (6 Items)

1. find out	2. set up	3. sort out
4. pay attention to	5. come up with	6. carry out

4. Your Task & Goal

Design a 10-minute browser-based English learning activity/app that helps these learners understand and appropriately use the six target expressions above.

- The specific instructional design, sequence, and activity types are entirely your decision.
- You may interact with the AI as much as you like during the given 20 minutes.
